

BIG TEN AUGMENTED INTELLIGENCE BOWL

This 1st Annual Big Ten Augmented Intelligence Bowl is hosted by the Institute for Augmented Intelligence in Medicine at Northwestern University.

A multi-disciplinary team from each Big Ten Academic Alliance school will compete to solve the issue of health disparities. Teams will focus on the issue of health disparities by identifying a problem, pitching a solution, and ultimately competing for prize money by presenting their implementation/proof of concept.

Tools for Success

- Bring together resources and talent in medicine, computer and data science
- Provide education and mentoring for students/trainees/faculty

Case

- Create solution prototypes that help address Health Disparities
- Examples that a proposal may focus on:
 - Risk prediction
 - Imaging analysis
 - Augmented decision making
 - Mitigating bias

Shared Goal

- Raise the profile and community around Augmented Intelligence and intensive data analysis across BIG10 Schools

Accepting Applications!

Each school is allowed to have one team in this competition. Please review the [Rules & Guidelines](#) before submitting your team application.

Deadline for team application: 11:59 pm CST on April 2, 2021
