

CALL FOR PARTICIPATION

2023 *VIRTUAL* STUDENT SPACE CONGRESS

November 8-9, 2023

Complimentary Registration

Scholarship Opportunity

NewSpace Chicago invites all high school, undergraduate, and graduate students to present their current space-related project, research, or endeavor at the 2023 Virtual Student Space Congress. This can involve astronomy, astrophysics, earth science, engineering, law, public policy, or any other substantive matter related to space. To do so, a student or group of students (though each will need to register for the event separately) only needs to submit their abstract and register for the Student Space Congress at the links below. There is no fee to participate. The deadline to submit your project is October 16, 2023.

Moreover, beyond the foregoing and opportunities to network with space professionals, NewSpace Chicago and its sponsor partners shall fund a scholarship to the student with the best presentation in each category (high school, undergraduate, and graduate).

Submit your abstract: <https://mlo.bz/2023SSCAbstracts>

Register: <https://mlo.bz/2023SSCRegister>

Event Page: <https://mlo.bz/studentcongress>
